

Inyeccion Contra Polio Cuminza Na Sport Park

Yunan di tur empleadonan staff y regular a cuminza recibi vaccination Salk contra polio den gymnasium di Lago Sport Park Diamars, October 14. E programa lo sigui pa mas of menos dos siman.

Vaccinacionnan lo worde administrá entre 8 a.m. y 1 p.m. ariba e dianan aki: Oct. 15, 16, 17, 18, 19, 21, 22, 23, 24, 25, 26, 28. E programa di vaccination lo no ta na vigor Diadomingo, October 20 y October 27.

Durante e programa solamente e di promer di e tres inyeccionnan cu tin mester pa inmunidad lo worde duná. E otro inyeccionnan di e serie lo worde duná mas despues, esun di dos tres siman despues di esun di promer, y esun di ultimo mas of menos siete luna despues di esun di dos.

E unico muchanan cu lo haya inoculacion e biaha aki ta esnan entre edad di seis luna y 13 anja. Muchanan di 13 pa 19 anja lo worde inoculá despues.

Identificacion

Na tempo di e promer inyeccion, muchanan, of esnan cu trece nan, mester tin hunto cu nan carchinan di identificacion di hospital. Despues di e promer inyeccion, e mucha lo worde duná un carchi indicando e fecha ariba cual el mester bolbe pa di dos y di tres inyeccion.

Oficialnan di Departamento Medico ta acentua cu sin e carchi di identificacion di hospital no por duna e inoculacion.

E programa di inoculacion door di Lago ta worde ehecúta hunto cu un campanja similar door di Servicio di Salud Publico na Aruba. Yunan di empleadonan cu ta eligible pa inoculacion pero cu ta biba leuw unda trasportacion pa Sport Park ta difícil pa haya, por worde inoculá door di equiponan di e Departamento di Salud Publico cu ta bishita e vecindarianan ey.

CONGRATULATING G. G. Corrington, Process Department, F. C. Donovan, superintendent of staff and services, hands him a 30-year certificate and service emblem.

FELICITANDO G. G. Corrington, F. C. Donovan, superintendente di staff & services, ta felicite'le pa completacion di 30 anja di servicio cu compania.

GENERAL SUPERINTENDENTE F. W. Switzer and Adriaan Arends of the Mechanical Department relax in the Management Staff meeting where Mr. Arends received his 30-year award and certificate.

SUPERINTENDENTE GENERAL F. W. Switzer y Adriaan Arends den reunion di Management Staff unda Sr. Arends a recibi su emblema y certificado pa 30 anja di servicio.

At Sport Park

Anti-Polio Inoculation Program Now Underway

Children of all staff and regular employees began receiving Salk polio vaccinations in the gymnasium of the Lago Sport Park Tuesday, Oct. 15. The program will continue for approximately two weeks.

Vaccinations will be administered between 8 a.m. and 1 p.m. on these days: Oct. 15, 16, 17, 18, 19, 21, 22, 23, 24, 25, 26, 28. The vaccination program will not operate Sunday, Oct. 20 or Sunday, Oct. 27.

During the program only the first shot will be given of the three needed for immunity. The others shots in the series will be given at later dates, the second coming three weeks after the first, and the last approximately seven months after the second.

The only children to be inoculated at this time will be those between the ages of six months and 13 years. Children from 13 to 19 will be vaccinated later.

Identification Needed

At the time of the first shot children, or those bringing them, must have in their possession hospitalization identification cards. After the first shot has been administered, the child will be handed a card indicating the dates to return for the second and third shots.

Medical Department officials emphasize that no vaccination can be given without the hospitalization identification card.

The inoculation program by Lago is being carried out in conjunction with a similar campaign by the Aruba Public Health Department. Employees' children eligible for inoculation who live in areas where transportation to the Sport Park Vaccination Center may be difficult, may receive their shots from the Aruba Public Health Department teams visiting in those areas.

The Medical Department stresses that children suffering from an acute illness or just recovering from one, or who have a fever will not be vaccinated at the time. After complete recovery, these children can start their series of shots.

Four Promotions Announced In Two Departments

W. F. Hughes, R. E. Boyack and R. T. Ball of the Mechanical Department, and J. R. Van Rite of the Process Department, were all promoted to higher positions Oct. 1.

In the Mechanical Department moves Mr. Hughes became assistant division superintendent, technical and administration; Mr. Boyack moved up to supervising engineer, planning and engineering, and Mr. Ball became assistant supervising engineer in the same group.

Mr. Van Rite was promoted to assistant shift foreman in Process-Utilities.

Beginning as tradesman in the Instrument Shop in January, 1937, Mr. Hughes became subforeman there in August, 1938. In February, 1940 he was made tradesforeman, and was promoted to planner in April, 1946. Later that year he became technical assistant in the Mechanical Department. In January, 1948 he became assistant zone supervisor in Mechanical-Administration, and was promoted to zone supervisor in October, 1949. Mr. Hughes was made group head, planning and engineering, in September, 1955, and supervising engineer in December, 1956.

Mr. Boyack, joining Lago in January, 1948 as a junior engineer in Mechanical - Administration, later worked as technical assistant, and in April, 1952, became engineer.

W. F. Hughes

R. E. Boyack

R. T. Ball

J. R. Van Rite

From January, 1954 to December, 1956 he worked as group head in Mechanical-Administration on several assignments. He was made assistant supervising engineer in December, 1956.

Mr. Ball came to Lago in August, 1956 as an engineer in Mechanical-Administration.

Starting his Lago career as job training instructor in Process-Utilities in February, 1952, Mr. Van Rite became operator in March, 1955. In November of the same year he became relief foreman in the same department.

Ludwig Orders Five New 104,500-Ton Supertankers

Construction of five new tankers, each 104,500 deadweight tons, has been ordered by D. K. Ludwig, the U. S. shipping magnate. It is believed to be the largest single private shipbuilding order ever reported, exceeded only by government contracts during the war.

The five supertankers will be built in the former naval shipyard in Kure, Japan, the same yard where Ludwig has built other tankers. It is under lease to his company, National Bulk Carriers, Inc.

Work will begin on the first of the huge new ships around June 1, 1958, and a company official said it will definitely be finished the same year. It is expected that this ship will be in service before the 106,000-tonner now under construction in Quincy, Massachusetts for A. S. Onasis, Ludwig's rival in the international shipping world.

Eight 100,000 Tonners

Ludwig's new order brings to eight the number of ships either planned or being built which will exceed 100,000 deadweight tons. Onasis is building two, and Stavros Niachos the other.

At the present time the biggest tanker in service is Ludwig's "Universe Leader," an 85,900-ton vessel.

Few details of the new ships were released, but it was understood that they would measure some 900 feet in length and have beams of 135

feet. Three ships—"Queen Elizabeth," "Queen Mary" and "United States"—are longer, but not nearly as broad as the tankers. No information was available of the draft of the ships.

Neither was there word of the cost involved. Based on reports that tanker-building costs in Japanese yards are about \$250 per deadweight ton, the cost of each tanker would be in the neighborhood of \$25 million.

No date was given for the completion of all five ships, because construction of "smaller" ships—45,000 and 85,000 tonners—will be built along with them, also in the Kure yards. Ludwig's lease expires in 1966, with an option for renewal to 1971.

One of Ludwig's ships, the 38,000-ton "Petrokure", called at Lago in December, 1954 with a 240,000-barrel cargo of crude. She was 673 feet long and had a beam of 92 feet, and attracted wide comment here.

30-Year Service Awards Go to Two

Thirty years of service by two Lago employees were commemorated early this month with the presentation of service emblems to Adriaan Arends, foreman, Mechanical-Yard, and G. G. Corrington, assistant shift foreman, Process-C&LE.

Making the presentation to Mr. Arends was F. C. Donovan, who was acting as chairman of the management staff meeting at the time. General Manager W. A. Murray awarded Mr. Corrington his certificate and emblem.

Mr. Arends was first employed in June, 1927 in the Mechanical Department and transferred to the pressure stills in February, 1930. In October, 1942 he moved to Mechanical-Yard.

Mr. Corrington, originally employed by Standard Oil Co. (N.J.) in September, 1927. He came to Aruba in March, 1935 and worked in the Accounting Department, the Esso Club, and transferred to Process-C&LE in December, 1941. He has no deductible absences, and has had no lost time injuries during his service in Aruba.

Dos Empleado A Cumpli 30 Anja Di Servicio

Trinta anja di servicio a worde recordá door di dos empleado di Lago mas tempran e luna aki cu e presentacion di emblemanan di servicio na Adriaan Arends, foreman, Mechanical-Yard, y G. G. Corrington, assistant shift foreman, Process-C&LE.

Haciendo e presentacion na Sr. Arends tabata F. C. Donovan, kende tabata actua como presidente di reunion di management staff. Gerente General W. A. Murray a presenta Sr. Corrington su certificado y emblema.

Sr. Arends a worde empleá na Juni 1927 den Mechanical Department y el a transferi pa pressure stills na Februari 1930. Na October 1942 el a bolbe pasa pa Mechanical-Yard.

Sr. Corrington, originalmente empleá door di Standard Oil Co. (N.J.) na September 1927. El a bini Aruba na Maart 1935 y a traha den Accounting Department, Esso Club, y na 1941 el a transferi pa Process-C&LE. El no tin ningun ausencia deducible y durante su servicio na Aruba el no a sostene ningun accidente cu perdida di tempo for di trabao.

ALL BUT one of the Equipment Inspection Group's 50 employees were on hand for a birthday picture, celebrating the group's 25th anniversary. Hospitalized at the time was G. T. D'Mattos. The present EIG chief, L. R. Seekins, is at far right, top row.

SOLAMENTE uno di e 50 empleadonan di Equipment Inspection Group tabata presente pa e retrato di fiesta aki na ocasion di 25 aniversario di e grupo. Esun ausente ta G. T. D'Mattos kende tabata den hospital. E actual hefe di EIG, L. R. Seekins, ta ultimo handa drechi, fila mas ariha.

EIG Celebrates 25th Anniversary This Month

Lago's Equipment Inspection Group, now an indispensable part of refinery operations, celebrates its 25th birthday Oct. 24.

It was on that day in 1932 that P. A. O'Brien was named chief equipment inspector, and three more men, J. C. Souder, M. G. Stevens and J. D. Millender, comprised the department. Their first office was in the small room in the old engineering building.

Establishment of the group shortly after the refinery was acquired by Standard Oil Co. (N.J.) in 1932 followed what was normal Jersey Standard practice. A growing refinery like Lago in 1932 was constantly adding new equipment, and its proper functioning and efficiency was dependent on an inspection group.

Mr. Souder succeeded Mr. O'Brien as chief of the group in February, 1936, and Mr. Millender in January, 1938, followed Mr. Souder. Of these four, Mr. O'Brien is retired, Mr. Souder is now with Esso Engineering, Mr. Stephens is with Creole in Caracas, and Mr. Millender was killed in the Texas City disaster a few years ago.

18 Men

By September, 1942, when W. B. Cundiff became chief equipment inspector, the group had expanded to 18 men. The office was in the building now used as the Safety Field Center, after having worked out of a number of offices and headquarters.

As the refinery grew, so did the EIG, which found itself with more and more to do. In the six-and-a-half years that covered the most of the war and the immediate postwar period, the department literally burst its seams. It grew from 18 employees in 1942 to 45 in March, 1949, when L. R. Seekins became chief. Halfway through that period, the group moved again, this time to the old Marine Office, on the site of the present air foam garage. Present quarters west of the Dining Hall were occupied in 1951.

It is fitting that Mr. Seekins, as chief, has the most EIG service of any of the present group. He joined in April, 1938. The second oldest employee in point of EIG service still in the group is Abdul Kadim, who started work as a clerk in November 1939.

Accidentenan Fuera Di Trabao ta Subi Pa Empleadonan

Cifranan nobo y sorprendente compila door di Departamento Medico di Lago pa e Comité cu ta studia seguridad for di trabao, ta indica graficamente e necesidad pa esfuernonan energetico y combiná pa reduci e cantidad di desgracia-nan cu ta socede cu empleadonan den nan tempo liber.

Cifranan ta muntra cu for di Jan. 1 di e anja aki te Sept. 30, seis empleado na trabao a haya accidente cu a resulta den perdida di tempo. Den e mes periodo, e cantidad di empleadonan cu a haya accidente for di trabao tabata 202. Durante henter 1956, e cifranan tabata 14 accidente cu perdida di tempo na trabao y 375 for di trabao.

E esfuernonan di compania pa for di trabao ta concentrá den un comité cual ta consisti di empleadonan di tur segmento di Lago. Poco despues cu el a worde organíz Vice Presidente Ehecutivo F. E. Griffin, den un carta mandá pa cas di tur empleadonan, a pidi pa apoyo di tur empleadonan den trabao di e comité. El a bisa cu experiencia di seguridad obteni na trabao mester worde hibá cas door di cada empleado y usá aya, ariba camina, y ariba terreno di deporte. Empleadonan a worde invitá door di Sr. Griffin pa manda idea y sugerencia na e comité pa studia seguridad for di trabao.

Esnan cu ta compone e grupo actualmente ta trahando ariba algun proyecto pa tene e programa andando. G. N. Owen ta presidente y miembronan ta inclui Dr. R. F. Erace, E. J. Kulisek, E. B. Fowler, H. M. Nassy, W. C. Mink, Jr. F. H. Rittfeld, Mateo Reyes, W. G. Spitzer, Abdul Syed, y C. B. Shapley, secretario.

EIG Ta Celebra Un Cuatro Siglo e Luna Aki

Equipment Inspection Group di Lago, avor un parti indispensable den operacionnan di refinaria, ta celebra su 25 anja di existencia Oct. 24.

Tabata ariba e fecha aki na 1932 cu P. A. O'Brien a worde nombrá chief equipment inspector, y tres homber mas, J. C. Souder, M. G. Stephens y J. D. Millender, tabata forma e departamento. Nan pater oficina tabata den un kamber chikito den e edificio di ingenieria bieuw.

Establecimiento di e grupo poco despues cu e refinaria a worde adquiri door di Standard Oil Co. (N. J.) na 1932 a sigui loke tabata practico normal di Jersey Standard. Un refinaria creciente manera Lago na 1932 constantemente tabata agrega equiponan nobo, y su propio funcionamiento y eficiencia tabata depende ariba un bon grupo di inspeccion.

Sr. Souder a sigui Sr. O'Brien como hefe di e grupo na Februari 1936, y Sr. Millender na Januari 1938 a sigui Sr. Souder. Di e lidernan original aki, Sr. O'Brien a bai cu pension, Sr. Souder ta avor cu Esso Engineering, Sr. Stephens ta

cu Creole na Caracas, y Sr. Millender a muri den e desastre di Texas City algun anja pasá.

Pa September 1942 tempo cu W. B. Cundiff a bira chief equipment inspector, e grupo a crece te 18 homber. E oficina tabata den e edificio cu awor ta worde usá como Safety Field Center, despues di a traha for di den un oficina pa nord di e actual GAR-2, y despues for di hopi oficina y headquarters.

Segun refinaria tabata crece, EIG tamba; esaki tabata haya mas y mas trabao. Den e seis y mitar anja cu a cubri guerra y e periodo inmediatamente despues di guerra, e departemento a crece rapidamente. El a crece di 18 empleado na 1942 te 45 na Maart 1949 tempo cu L. R. Seekins a bira hefe. Mitar entre di e periodo aki, e grupo a bolbe move, e biahá aki pa Marine Office bieuw, e edificio cu awor ta worde usá como air foam garage. E edificio actual pabao di Dining Hall a worde ocupá na 1951.

Awe, 25 anja despues cu el a principia, tin exactamente 50 empleado den e grupo.

Sr. Seekins, como hefe, tin mas servicio na EIG cu cualkier otro hende den e grupo actual. El a cuminsa traha na April 1938. E di dos empleado den servicio den e grupo ta Abdul Kadim, kende a cuminsa como oficinista na November 1939.

Retirement Ends Careers For Two

Two more long-service men are leaving Lago service on retirement. They are Maximo Gomes, who retired Nov. 1, after 29 years, and Ignacio Rasmijn, who retired Oct. 1.

Maximo Gomes

Ignacio Rasmijn

Mr. Gomes, first employed as a laborer in March, 1928, became still cleaner in November, 1931 in the Acid Plant, and later held the same job on the pressure stills. He moved to the wharves as wharfinger in December, 1941, where he has remained. His present position is dockman. He intends to remain here in Aruba.

Mr. Rasmijn, also a dockman in Receiving and Shipping, started to work at Lago in July, 1937 as a laborer. In November, of the next year, he transferred to the docks as wharfinger, and was made dockman in August, 1955.

Mr. Gomes' service totalled 29 years, four months, Mr. Rasmijn's 20 years, two months.

Cuatro Promocion Anunciá den Dos Departamento

W. F. Hughes, R. E. Boyack y R. T. Ball di Mechanical Department, y J. R. Van Rite di Process Department a worde promovi pa posicionnan mas halto Oct. 1.

Den Mechanical Department Sr. Hughes a bira assistant division superintendent, technical and administration; Sr. Boyack a move ariba pa supervising engineer, planning and engineering, y Sr. Ball a bira assistant supervising engineer den e mes grupo.

Sr. Van Rite a worde promovi pa assistant shift foreman den Process-Utilities.

Cumizando como tradesman den Instrument Shop na Januari 1937, Sr. Hughes a bira subforeman aya na Augustus 1938. Na Februari 1940 el a bira tradesforeman, y a worde promovi pa planner na April 1946. Mas laat den e mes anja el a bira technical assistant den Mechanical Department. Na Januari 1948 el a bira assistant zone supervisor den Mechanical-Administration, y a worde promovi pa zone supervisor na October 1949. Sr. Hughes a bira group head, planning and engineering, na September 1955 y supervising engineer na December 1956.

Sr. Boyack, kende a cuminsa traha cu Lago na Januari 1948 como junior engineer den Mechanical-Administration, den despues a traha como technical assistant, y na April 1952 el a bira engineer. Desde Januari 1954 pa December 1956 el a traha como group head na Mechanical Administration ariba varios proyecto. El a bira assistant supervising engineer na December 1956.

Sr. Ball a bini Lago na Augustus 1956 como un engineer den Mechanical Administration.

Cumizando su carera na Lago como job training instructor den Process-Utilities na Februari 1952, Sr. Van Rite a bira operador na Maart 1955. Na December e mes anja el a bira relief foreman den e mes departamento.

Dos Empleado Cu Pension

Dos empleado mas cu servicio largo ta bai cu pension. Nan ta Maximo Gomes, kende ta retira Nov. 1, despues di 29 anja di servicio, y Ignacio Rasmijn, kende a retira Oct. 1.

Sr. Gomes, kende a worde empleá como un laborer na Maart 1928 a bira still cleaner na November 1931 den Acid Plant, y despues el a ocupa e mes puesto den pressure stills. Na December 1941 el a move pa Wharves como wharfinger, unda el a keda. Su posicion actual ta dockman. El tin intencion di keda aki na Aruba.

Sr. Rasmijn, tambe un dockman den Receiving & Shipping, a cuminsa traha na Lago na Juli 1937 como laborer. Na November e siguiente anja el a transferi pa waaf como wharfinger, y na Augustus 1955 el a bira dockman.

Sr. Gomes a alcanza un total di 29 anja, cuatro luna di servicio. Sr. Rasmijn a yega 20 anja, dos luna.

ADOLPHUS DALLISON, third from left, and his friends seem to be enjoying his retirement luncheon. Mr. Dallison, with just over 15 years of service in the Mechanical Department, was joined by A. Douglas, G. Arens, G. B. Mathews, G. Uhr, M. E. Robertson and W. L. Edge.

ADOLPHUS DALLISON, tercer handa robez, y su amigonan ta gozando di su comida di retiro. Sr. Dallison, cu poco mas di 15 anja di servicio den Mechanical Department, a worde acompaña pa A. Douglas, G. Arens, G. B. Mathews, G. Uhr, M. E. Robertson y W. L. Edge.

Annual Election October 29-30

Lago Sport Park Board constituents will choose five new board members from a slate of 18 candidates at the annual election Oct. 29-30. Four of the 18 are seeking re-election, the others were nominated by the Nominating Committee or by petition.

The four incumbent members on the ballot are R. E. A. Martin, M. Reyes, R. Q. Kemp, and J. Briezen. The other candidates are F. L. Hodge, J. M. Kock, I. V. A. Mendes, J. A. Bislick, D. N. Solomon, C. A. Pierre, L. Winterdaal, P. De Cuba, W. J. Diaz, N. A. Brathwaite, E. E. B. Richardson, E. E. Carilho, T. Johnson and R. A. Chin-A-Loi.

Mr. Bislick, billing clerk in the Accounting Department, represents softball, baseball and football. He has seven years of service. Mr. Briezen represents cricket and baseball. He has 14 years, three months of service, and is a clerk in Process-Cracking.

N. A. Brathwaite is a catalog records clerk in the Storhouse, and

the ballot are R. E. A. Martin, M.

represents athletics and weightlifting. He has six years of service. Mr. Carilho, a machinist helper with 15 years, 4 months of service, represents football, cricket and basketball. Mr. Chin-A-Loi, represents athletics and cycling. A comptometer operator in the Accounting Department, he has eight years, nine months of Lago service.

Representing football and baseball, P. De Cuba, machinist helper A. Mechanical-Machinist, has five years, 11 months of service. Mr. Diaz, junior engineering assistant, TSD, represents football and baseball, and has been in Lago's employ for nine years. Mr. Hodge represents football, softball, football, boxing and volleyball. With 13 years, nine months of service, he is file and cable clerk in the Executive office.

Mr. Johnson is assistant operator in the Process Department. With 19 years, five months of service, he represents athletics, cricket and football. Mr. Kemp, a five-year veteran, is training instructor in the Lago Police Department. He represents football.

Mr. Kock, also representing football, is a driver, Mechanical-Garage and Transportation, with 11 years, four months. Mr. Martin, who has 19 years, five months of company service, represents cricket and base-

E. Richardson

ball. He is group head, Mechanical-Administration.

Mr. Mendes, another long service employee, with 18 years, two months, is an operator in the Process Department. He represents cricket and volleyball. Representing volleyball is C. A. Pierre, electrician in Mechanical-Electrical, who has nine years, 10 months of service.

Mr. Reyes is also an electrician in Mechanical-Electrical. He represents softball and tennis. He has 18 years, four months of service. Mr. Richardson, a patrolman in the Lago Police Department, has 19 years seven months of company service, and represents cricket and baseball.

Representing cricket, D. N. Solomon, dry storage clerk in the Wholesale Commissary, has 19 years of service. Mr. Winterdaal is paint helper, Mechanical-Paint, represents football and baseball. He has one year, eight months of service.

Eleccion Anual October 29-30

Constituyentenan di Lago Sport Park Board lo escoge cinco miembro nobo for di entre 18 candidato den e eleccion anual Oct. 29-30. Cuatro di e 18 ta pa re-eleccion, e otronan a worde nombrá door di e Comité Nominativo of pa medio di peticion.

E cuatro miembronan pa re-eleccion ta R. E. A. Martin, M. Reyes, R. Q. Kemp, y J. Briezen. E otro candidato nan ta F. L. Hodge, J. M. Kock, I. V. A. Mendes, J. A. Bislick, D. N. Solomon, C. A. Pierre, L. Winterdaal, P. de Cuba, W. J. Diaz, N. A. Brathwaite, E. E. B. Richardson, E. E. Carilho, T. Johnson y R. A. Chin-A-Loi.

Sr. Bislick, billing clerk den Accounting Department, ta representa softball, baseball y futbol. El tin siete anja di servicio. Sr. Briezen ta representa cricket y baseball. El tin 14 anja, tres luna di servicio y el ta klerk den Process-Cracking.

N. A. Brathwaite ta catalog records clerk den Storehouse, y ta representa atletismo y hizamento di peso. El tin seis anja di servicio. Sr. Carilho, un machinist helper en 15 anja, 4 luna di servicio, ta representa futbol, cricket y basketball. Sr. Chin-A-Loi ta representa atletismo y cychismo. Un comptometer operator den Accounting Department, el tin ocho anja, nueve luna di servicio na Lago.

Representando futbol y baseball, P. de Cuba, machinist helper A. Mechanical-Machinist, tin cinco anja, 11 luna di servicio. Sr. Diaz, junior engineering assistant, TSD, ta representa futbol y baseball, y tin nueve anja di servicio na Lago. Sr. Hodge ta representa futbol, softball, boxeo y volleyball. Cu 13 anja, nueve luna di servicio, el ta file y cable clerk den Executive Office.

Sr. Johnson ta assistant operator

den Process Department. Cu 19 anja, cinco luna di servicio, el ta representa atletismo, cricket y futbol. Sr. Kemp, un veterano di cinco anja, ta training instructor den Lago Police Department. El ta representa futbol.

Sr. Kock, kende ta representa tambe futbol, ta un chofer den Mechanical-Garage and Transportation, en 11 anja, cuatro luna di servicio. Sr. Martin, kende tin 19 anja, cinco luna di servicio cu compania, ta representa cricket y baseball. El

History Of American Baseball Goes Back To 18th Century Child's Game of England

AN EARLY first baseman leaps high to spear a wild throw.

UN ANTIGUO primera hase ta hula halto pa coi un tirada wild.

In the year 1907, there were firmly established two major baseball leagues. That year Detroit, winning 92 ball games, and Chicago winning 107, met in the World Series. The Cubs swept it in four games.

That year, too, a seven-man commission was named to settle once and for all the origin of the noble game of baseball. The group was appointed by A. G. Spalding, a pioneer player and at the time head of the Spalding sporting goods firm, and consisted of other sporting figures, and dignity was supplied by a U. S. Senator. There had been intimations that baseball was but a refinement of an old English game for boys called "rounders."

The commission, whose research was more patriotic than scholarly, published its findings in the Baseball Guide of 1908, and said categorically that baseball was a completely native-born American game, unsullied by influences from over the sea, and that the rules for playing the game, and the layout of the field were devised in 1939 by Abner Doubleday, sometime general in the Union Army.

Thus everyone rejoiced, although it had never occurred to spectators or students that baseball was not in fact a lineal descendant of at least two games. There was "rounders," and there was "one old cat," both of which involved striking a ball with a bat and running from base to base. But the Spalding Commission said no; those games were all very well, but baseball was American.

The Spalding people simply didn't dig deep enough, or else, like some researchers, found only what they wanted to find. Whatever the case, the fact remains that letters and books going back to the 1700's indicate not only use of the word "baseball" in connection with a hit-and-run game, but a booklet, published first in 1744, shows a batter, pitcher, catcher, two bases and two infielders, all under the name of "baseball." There are later references, all patiently turned up around 1939 by Robert W. Henderson of the New York Public Library, that show baseball, or its grandfather, was popular in the Continental Army of 1778, at Princeton College in 1787, and in other places early in the 19th century.

Proof

But the document that blew the Spalding Commission into a cocked hat was a book called "The Boy's Own Book," published in London in 1828. According to it, the game called "rounders" was played on a diamond, just as today's game. There were rules defining foul balls, which prevented a batter from running; the strikeout was pronounced, the fly ball, the run, were all the practice of the London lads. What was perhaps the major difference was in the custom of retiring runners by hitting them with the ball. It was shortly after baseball became popular in the United States, around 1840, that this bloodthirsty rule was eliminated. Baseball fans and scholars, however, need not sneer at Doubleday, because he did much to have the game accepted and popularized.

Various clubs and municipalities began fielding baseball teams from 1858 onwards, and the sport spread when demobilized soldiers brought the game home from Union Army camps of the War Between The

LOOKING LIKE a dandy with his luxuriant mustache, the hitter takes a powerful cut. Note the square plate, and the thin glove the catcher wears.

PARCIENDO UN "dandy" cu su mustache grandi, e bateador aki ta saca un palo duro. Ripara e plachi vierkant, y e handschoen fini di e catcher.

States. Professionalism began to creep in shortly after the war. The Cincinnati Red Stockings made a fabulously successful tour in 1869 and in fact didn't lose a game until June, 1870. This was the first professional baseball team. Amateur baseball as a national sport died quite peacefully in 1874, three years after the National Association of Professional Baseball Players was organized, representing teams in Philadelphia (Athletics), Boston (Bostons), Chicago (White Stockings), Brooklyn (Eckfords) Cleveland (Forest Citys), Troy (Haymakers), Fort Wayne (Kekiongas)

Baseball Tin Un Historia Largo, Cuminzando 150 Anja Pasa

Na anja 1907 tabatin firmemente estableci dos liga mayor di baseball. E anja aki Detroit, ganando 92 wega, y Chicago ganando 107, a encontra otro den Serie Mundial. Chicago Cubs a gana den euatro wega consecutivo.

E anja aki, tambe, un comision di siete homber a worde nombrá pa decidi pa un vez y pa semper e origen di e noble wega di baseball. E grupo a worde nombrá pa A. G. Spalding, un hungador pionero y na e tempo director di un casa di articulonan di deporte, y tabata consisti di otro figuranan for di deporte y hasta e dignidad di un Senador di Estados Unidos. Tabatin cierto reclamonan cu baseball tabata un perfeccion di un wega antiguo Ingles di mucha homber cual tabata yama "rounders."

E comision, cual su investigacion tabata mas patriotico cu escolar, a publica su resultatonan den Baseball Guide di 1908, y a bisa categoricamente cu baseball tabata un wega completamente Americano, sin influencia ultramar, y cu e reglanan pa hunga e wega, y e layout di e terreno a worde devisá na 1839 door di Abner Doubleday, un general casual den Union Army.

Tur hende a alegra, maske nunca rirones of studiantenan a pensa cu baseball no tabata berdaderamente un descendiente directo di a lo menos dos wega. Tabatin "rounders," y tabatin un "old cat" y den tur dos mester a dal un bala cu un bat y corre for di base pa base. Pero e Comision di Spalding a bisa no; masha bunita, pero baseball ta Americano.

E hendenan di Spalding no a investiga bastante profundo, pero mescos cu algun otro investigador, a haya solamente loke nan kier a

fielders, tur bao di e number di baseball. Tin referencianan mas despues, tur busca cu pasenshi mas of menos na 1939 door di Robert W. Henderson di New York Public Library, cual ta muntra baseball, of su abuelo, tabata popular den Continental Army na 1778, na Princetown College na 1787, y na otro lugarnan den siglo 19.

Pero e documento cu a caba cu e Comision di Spalding tabata un bur (Continued from page 4)

Records to Remember

Ty Cobb is the only player in baseball history to collect more than 4,000 hits. His record is 4,191.

The highest batting average for a single season was .424, hit by Rogers Hornsby in 1924 with the Louis Cardinals.

Recordnan Memorabile

Ty Cobb ta e unico hungador den historia di baseball cu a colecta mas di 4,000 hits. Su record ta 4,191.

E averaje mas halto di bateria den un solo temporada tabata .424, bati door di Rogers Hornsby na 1924 cu St. Louis Cardinals.

HERE COMES the high hard one. The quilted trouser fronts provided protection from line drives.

AKI TA bini un duro. E adilanti di e carson ta furni proteccion contra roletazonan.

THIS IS what a ball game looked like before the turn of the century. This drawing and the others on this page represented baseball as it was played in 1889.

ASINA tabata un wega di pelota promer cu cambio di siglo. E pintura aki y otronan ariha e pagina ta representa baseball di anja 1889.

AND HERE is the greatest of them all: George Herman "Babe" Ruth, the man who dominated baseball for 20 years as a player, and whose name is written large in the record books.

Y ESAKI ta esun mas grandi di tur: George Herman "Babe" Ruth, e homber cu a domina baseball 20 anja como un hungador, y kende su number ta aparece halto den bukinan di record.

New Version

"Hand Soccer" Game is Easy To Make and Easy To Play

The newest version of an ancient game, a sort of indoor football match, combines the excitement of soccer with the dexterity of the billard table, and throws in for good measure just enough wood-working to satisfy the do-it-yourself fan.

Call it "hand soccer" or anything like that. It doesn't matter that this particular version of the game and the plans for it were drawn up by a man who lives in Maryland; or that the same game, or one just like it, is played in Parisian cafes, in Lima, in Surinam, all over the world, in fact; or that it has been going on for generations, and possible centuries. All that matters is that it is a very good game to play, and in this case, a very easy game to manufacture.

In its simplest terms, it is an open plywood box, resting on a table top. Wooden rods extend across the box through holes in the sides, with enough rod sticking on each side to form a handle.

Each rod has small wooden paddles fastened to it. Players—one, two, or three—on each side attempt to manipulate the rods so that the paddles will bat a ping-pong ball towards its goal, a hole at each end of the box. That's the basic idea of the game.

Players can twist, rotate or slide the rods so that the paddles block or drive the ball along. Each side plays the ball to its left. The goal is a four-inch aperture cut in the

end with a big piece of net hung over it to catch the ball.

One advantage of a game like this is that players can make up their own rules. Thus 21 points can constitute a game, or one hour, or four quarters, or any system that seems suitable.

To win consistently in this game takes more than luck. As a matter of fact, the inventor of this particular version of indoor soccer, Alden Todd, claims that a winning player needs about 75 per cent skill and 50 percent luck. That's to win. All one needs just to play is the luck.

Materials needed to make this game are two sheets of plywood, two by four feet; one 1/4-inch; one 1/2-inch; six 3-3/4-inch wooded dowels, three feet long, and assorted screws, nails, rubber washers, some glue and some paint. The resulting box is a little over three feet long, two feet wide and six inches high. Complete plans and instructions all free of charge, can be obtained by writing Douglas Fir Plywood Association, Tacoma 2, Washington, U.S.A.

PLAY BALL! Two teams are getting all wound up in a fast game of indoor soccer played in an easily-made box. PLAY BALL! Dos equipo ta den accion den un wega rapido di futbol di paden hunga den e cabita cu por worde traha facilmente.

THIS IS all the material needed, plus glue and paint, to manufacture the game. The player doesn't have to be a skilled craftsman to put it together, either.

ESAKI TA tur e material cu tin mester, plus lijn y verf, pa forma e wega. E hungador no tin mester di ta un artesano di experiencia pa haya trabe'le.

Wega Bieuw Facil pa Traha, Hunga

E version mas nobo di un wega antiguo, un sorto di futbol di paden, ta combina e excitacion di futbol y e dexteridad di mesa di biliard, y ta contene bastante trabao pa satisfice un aficionado cu ta gusta haci cos su mes.

Yam'le "futbol cu man" of con cu ta. No ta importa cu e version particular aki di e wega y su planan a worde devisá door di un homber cu ta biba na Maryland; of cu e mes wega, of un mescos cu ne, ta worde hunga den cafénan di Paris, na Lima, Surinam, over di henter mundo mes; y cu esaki ta tumando lugar generacionnan y posiblemente siglonan. Tur loke ta importa ta cu e ta un bon wega pa hunga y facil pa traha.

Den su forma mas simple, e ta un caha di triplex habri, sosegando ariba un mesa. Baranan di palo ta

extende over di e caha door di buraconan na mando, cu bastante bara saliendo na cada banda pa forma un handle.

Na cada bara tin remanan chikito di palo. Hungadornan - un, dos, of tres - na cada banda ta purba manipula e baranan asina cu e remanan ta bati un bala di ping-pong den goal, un buraco na cada banda di e caha. Esey ta e idea basico di e wega.

Hungadornan por troce, draai of lastra e baranan asina cu e remanan ta blokea of pusha e bala. Cada banda ta hunga e bala na su robez. E goal ta un apertura di cuatro duim cortá na fin cu un bon pida net colgá over di dje pa recoge e bala.

Un ventaha di un wega manera esaki ta cu hungadornan por formula nan mes reglanan. Anto 21

punto por constitui un wega, of un ora, of cuatro cuarto, of cualkier sistema cu ta parce adecuado.

Pa gana constantemente den e wega aki tin mester di mas cu suerte. E inventor di e wega aki, Alden Todd, ta huzga cu un ganador mester tin como 75 por ciento di habilidad y 50 por ciento di suerte. Esey ta pa gana.

Materialnan cu tin mester pa traha e wega aki ta dos plachi di triplex, dos pa cuatro pia; un 1/4 inch, un 1/2 inch; seis bara di palo di 3/4 inch, tres pia largo, y schroef, clabo, washers di rubber, un poco lijn y verf. E caha cu resulta ta un poco mas cu tres pia largo, dos pia hancho y seis inch halto. Plannan completo y instruccionnan gratis por worde obteni door di scirbi Douglas Fir Plywood Association, Tacoma 2, Washington, U.S.A.

AFTER CUTTING out the components, next step is put together the sides and ends. Holes are slightly larger than the dowels that go through them to permit easy manipulation. DESPUES DI corta e partinan componente, e proximo paso ta pa pone hunto e banda y puntonan. E buraconan ta poco mas grandi cu e baranan cu ta pasa door di nan pa permiti manipula nan facilmente.

FASTENING PADDLES to the dowels looks tricky, but it isn't. A flat bed, the width of the paddle, is chiseled out of the dowel, and the paddles are glued or screwed in. MARAMENTO DI e remanan na e baranan ta muntra dificil, pero no ta. Un flat bed, hanchura di e rema ta worde sacá for di den e bara, y e remanan ta worde gelijm of geschroef aden.

AFTER DOWELS have been inserted in holes, the final side of the box is positioned and either nailed or screwed together. Fish net or some similar material can be used for the net. DESPUES CU baranan worde pasá den e buraconan, e banda final di e caha ta worde poni na posicion y sea clabá of geschroef na otro. Tarai of material similar por worde usá pa e net.

ACTION PILES up around the goal as two attackers send the puck flying in. It's the goalie's job—facing out—to knock the puck down. **ACCION TA** tuma lugar dilanti goal mientras dos atakante ta manda e puck halto aden. Ta trabao di e keeper—cu cara pafor—pa wanta e puck.

Ice Hockey Is Rough, Fast Game

One of the most popular winter sports, both amateur and professional, in the northern United States and Canada is ice hockey. It's a game that calls for a variety of skills—speed on skates, agility, quick reflexes, endurance, and ability to handle a cumbersome stick while skating at full speed.

Ice hockey is an outgrowth of the field hockey which developed in Europe centuries ago, and is still immensely popular there, and to a lesser extent in the United States.

But it is the swift, flashing game on ice that attracts so much interest and participation. In some places indoor ice rinks make it possible for players to practice all year long, and in certain parts of Canada and northern United States, winter comes early and stays late.

The game is a simple one essentially. There are six men on a side, each equipped with long-handled stick that has a wide blade at the end. With these sticks they can push the puck along the ice. The puck is a flat hard rubber disk which, propelled by a skilled practitioner, can travel up to 90 miles per hour. At each end of the playing area is a goal, as on a football field, that is six feet long and four feet wide. To the goalie defending it, the opening seems to be as big as a cave; to the attacking team that hopes to slam the puck through the goal, it looks as big as a matchbox. The goalie never leaves his post. He stays there to knock aside the puck whirling at him from all sides, using his padded legs and chest, his gloved hands, his skates, his stick and occasionally, his face. Like everybody on a professional hockey team, a goalie has to be good. With the puck flashing around him at incredible speeds, he has to keep his eyes on it and the enemy players all at once.

Ice hockey is regarded by many as the most violent of all contact sports. With the rink filled with speeding, burly bodies the chances of collision are great. Legally, defensive players can block their opponents with their bodies, and can also tangle sticks. In the heat of play tempers often flare up, and it is a rare professional hockey game

in which there isn't at least one fight.

For fights, and for other violations of the rules, players are banished from the game to the penalty box for varying lengths of time, depending on the seriousness

IJs Hockey ta Wegá Duro

Un di e deportenan inverná mas popular, tanto amateur como profesional, den parti norte di Estados Unidos y Canada, ta ijs hockey. E ta un wegá cu ta demanda un variedad di habilidá — velocidad ariba schaats, mente liher, reflexo rapido, perseverancia, y habilidá pa maneja un bate trabajose mientras bo ta schaats na plena velocidad.

Ijs hockey ta un desaroyo for di veld hockey cual a cuninza na Europa hopi siglonan pasá, y ainda ta hopi popular aya, y un poco menos na Estados Unidos.

Pero ta e wegá rapido y brillante ariba ijs ainda ta atrae mas tanto interes y participacion. Na algun lugarnan rink trahá paden ta haci posible pa hungadornan practica henter anja largo, y na cierto lugarnan di Canada y parti norte di Estados Unidos invierno ta bini tempran y ta dura te laat.

E wegá en efecto ta simple. Tin seis homber na un banda, cada un cu un palo cu braza largo cu tin un blade hancho na fin. Cu e palo aki nan por pusha e puck ariba e ijs. E puck ta un disco plat y duro di rubber cual, manehá pa un hungador experto, por bai te 90 milla pa ora. Na cada final di e terreno tin un goal, mescos cu ariba veld di futbol, esta seis pia largo y cuatro pia hancho. Pa e keeper cu ta defende e apertura aki ta parece mes hancho cu un cueba; pa e equipo atakando cu ta spera di manda e bala goal, e ta parece mes grandi cu un caha di lucifer. E keeper nunca ta laga su puesto. El ta keda ey pa wanta e puck cu ta bini ariba dje di tur banda, usando su pianan y pecho cubri, su man bistí cu hand-schoen, su schaats, su bate y de vez en cuando su cara. Mescos cu cualkier hungador den un equipo profesional di hockey, e keeper mester ta bon. Cu e puck avanzando na velocidad increible, el mester tene su vista ariba dje y ariba e hungadornan oponente na mes tempo.

Ijs hockey ta worde considerá door di hopi hende como e mas violente di tur deportenan di contacto. Cu e rink yená di hendenan cu ta schaats den otro na velocidad halto, e chens pa dal contra otro ta grandi. Legalmente, hungadornan

of the misdemeanor. During a player's absence in the box, his team must get along without him as well as it can, for he cannot be substituted for.

Like every sport, success in hockey depends on teamwork. There's no place on a hockey team, a football team, a baseball team or a basketball team for the man who wants to do it all himself. That's the secret of sports.

defensivo por blokea nan oponentenan cu nan curpa, y tambe nan por bruha bate. Den calor di wegá temperamentonan ta subi hopi vez, y e wegá di ijs hockey profesional den cual no tin a lo menos un pelea ta raro.

Pa bringamento, y pa otro violacionnan di reglanan, hungadornan ta worde sacá for di wegá pa periodonan variable di tempo, dependiendo ariba seriedad di e ofensa. Durante ausencia di un hungador, su equipo mester sigui hunga sin e, pasobra el no por worde reemplazá.

Boys and Girls Page

Asina Un Pueblo A Bini na Existencia

Un vez tabatin algun Indian cu tabata pasa nan tempo na piscamento y jaagmento den seroenan. Por fin nan a cansa di dwaal rond y nan a pidi e Grand Spirito pa duna nan un cas fiho. El a scucha nan pedida y a bisa, "Sigui e aguila te ora un pluma cai. E lugar ey lo ta bo cas pa semper."

E Indiannan y nan hefe a decidi di sigui conseho di e Gran Spirito. Un dia nan a mira un aguila grandi ta bula rond den laria. Nan a waak e bon; algun Indian a sigui'e varios dia. Por fin un di su plumanan a cai na orilla di un rio.

E Indiannan tabata masha contento te ora nan a mira un otro pluma cai for di hala di e aguila! Esaki a cai na otro banda ariba orilla di e mes rio.

Anto e Indiannan no tabata sabi kiko haci. Hopi ora largo nan a sinta discuti e problema rond di kampvuur. Algun tabata kier a traha e pueblo of rancho na banda robéz; otro tabata insisti cu mester a trah'e na unda e promer pluma a cai. Por fin nan a decidi pa traha dos pueblo, y pronto nan tabata biba na tur dos banda di e rio.

E Navajos ainda ta biba den e dos pueblonan na Taos, New Mexi-

co. Cada anja nan ta tene un concurso pa determina cual banda lo eligi e gobernador pa e siguiente anja. Cada pueblo ta scoge varios di su landadornan mas liher den un pustamento. E banda cu gana e pustamento por eligi su gobernador!

Legend Tells Of Ancient City

Once upon a time, there were some Indians who spent their time hunting and fishing in the mountains. Finally, they tired of wandering about and asked the Great Spirit to give them a permanent home. He listened to their plea and said, "Follow the eagle until a feather falls. That spot shall be your home for all time."

The Indians and their chief decided to follow the Great Spirit's advice. One day, they saw a huge eagle sailing around in the sky. They watched it very closely; some of the Indians followed it for several days. At last, one of its feathers fell to the ground on the bank of a river.

The Indians were very happy until someone saw another feather fall from the eagle's wing! This one fell on the opposite bank of the same stream.

Then the Indians didn't know what to do. They discussed their problem around the camp fire for a long time. Some wanted to build the pueblo or village on the left bank; others thought it should stand where the first feather had fallen. Finally, they decided to build two villages, and in a short time they were living on both sides of the river.

The Navajos still live in these two pueblos at Taos, New Mexico. Every year, they hold a contest to determine which side will elect the chief for the coming year. Each pueblo chooses several of its swiftest runners to represent it in a relay race. The winning side in the race is entitled to choose the new chief!

Nov. 26 - 8:15 p.m. San Nicolas Jrs. vs. Rapid

Baseball

(Continued from page 4)

and New York (Mutuals). This group, though shaky, deserves recognition as the first league.

National League

In 1876, the National League came into existence, with teams in Philadelphia, Hartford, Boston, Chicago, Cincinnati, Louisville, St. Louis. Six years later, The American Association was formed in various cities, and went along its minor league way until 1891 when they started a "war" with the National League. In the next few years, inter-league trades, player raids and a general bitterness weakened the whole structure of baseball. The National League became a 12-team loop. By the start of 1903's season, the American Association, by then called the American League, had established its roster of cities that remained in the league until the St. Louis-Baltimore shift in 1953. In 1903, too, peace was established between the two leagues, and baseball was saved. The first World Series that year saw the upstart Boston Red Sox of the new league beat Pittsburgh in the best-of-nine games.

A National Commission governed the sport from 1903 to 1921, when Judge Kenesaw Mountain Landis became the first commissioner of baseball, the supreme authority, which post is held today by Ford Frick.

So that is, in brief the history of baseball: rough in places, vague in others, but a history, nonetheless, that has given the world many exciting days and games, up to and including the last World Series.

Grant Winner Writes Letter

Miss Bernice Philips, who left Aruba recently to study education on a Lago Scholarship Foundation grant, reports in a letter to the Foundation that "everything is fine" in Holland, and that her studies have begun.

Miss Phillips, a student at the R. K. Kweekschool in Reuver, Holland, is the daughter of G. L. Phillips of the Lago Police Department.

In her letter she expressed her appreciation to the Foundation for its help in these words: "Once more Lago is proving its interest in Aruba's future by helping us students."

She also mentioned that she had already visited a number of different places in Holland, which, she wrote, "is a nice country."

(Continúa di pagina 4)

ki titulá "The Boy's Own Book," publicá na Londres na 1828. Segun esaki e wega cu yama "rounders" tabata worde hungá ariba un cuadro mescos cu e wega di awendia. Tabatin regla pa clasifica fouls, eual tabata preveni un corredor di corre; strike-out tabata pronuncia, fly ball, e careda, tur tabata practico di e hobennan di Londres. Podiser e diferencia mas grandi tabata den e costumber di saca hungadornan ora nan worde gedal cu e bala. Tabata poco despues cu baseball a bira popular na Estados Unidos rond di 1840 cu e regla sangriente aki a worde eliminá. Amantenan di baseball y escolarnan no tin mester di hala nanishi pa Doubleday, pasobra el a haci hopi pa haci e wega popular y aceptá.

Varios club y comunidnan a cuminsa organiza equiponan di baseball for di 1858 pa ariba, y e deporte a plama ora soldánan cu a sali for di den ehército a trece e wega cas for di campeonan di Union Army despues di e guerra entre estadonan. Profesionalismo a cuminsa lamta cabez poco despues di e guerra, y Cincinnati Red Stockings a haya un jira extremamente exitoso na 1869 y no a perde un wega sino te na Juni 1870. Esaki tabata di promer equipo profesional di baseball. Baseball amateur como un deporte nacional a muri na paz na 1874, tres anja despues cu e Asociacion Nacional di hungadornan profesional di baseball a worde organizá, representando equiponan na Philadelphia (Athletics), Boston (Bostons), Chicago (White Stockings), Brooklyn (Eckfords), Cleveland (Forest Citys), Troy (Haymakers), Fort Wayne (Kekiongas) y New York (Mutuals). E grupo aki, aunque no mucho firme, ta worde reconoci como e promer liga.

Liga Nacional

Na 1876, Liga Nacional a bini na existencia, cu equiponan na Philadelphia, Hartford, Boston, Chicago, Cincinnati, Louisville, St. Louis. Seis anja despues, e Asociacion Americano a worde formá den varios ciudad, y a sigui como un liga menor te 1891 tempo cu nan a cuminsa un "guerra" contra Liga Nacional. Den e siguiente anjanan, cambianan entre liganan, robamento di hungador di otro y malcontento general, a debilita henter e structura di baseball. Liga Nacional a bira un sistema di 12 equipo. Pa cuminzamento di e temporada di 1903, Asociacion Americano, cu ya e tempo tabata conoci como Liga Americano, a establece un lista di ciudadnan cu a keda den e liga te e cambio di St. Louis-Baltimore na 1953. Na 1903 a bini paz tambe entre e dos liganan, y baseball a salba. E promer Serie Mundial e anja ey a presenta Boston Red Sox di e liga nobo, cual a batí Pittsburgh den un serie di nuebe wega.

Un Comision Nacional a governa e wega for di 1903 pa 1921, tempo cu Juez Kenesaw Mountain Landis

Afiliado Petroquimico Ta Celebra 25 Anja

Equipment Inspection Group di Lago no ta e unico cu ta celebra su 25 aniversario den e dianan aki.

Enjay Co. formá originalmente como Standard Alcohol Company, lo ta 25 anja bieuw otro luna.

Enjay - e nomber cu e ta carga desde 1946 - ta desaroya y vende aki y den e stranheria productonan petroquimico trahá door di afiliadonan di Standard na Estados Unidos. Na tur, como 40 diferente petroquimico ta worde bendi door di e company, y mayoria di nan ta bini di gas oil of naphta cu a worde gekraak cu stiem of segun proceso catalytico.

Enjay ta defini un petroquimico como "cualkier producto specialmente derivá for di petroleo cual su mes ta un compuesto organico quimico, of un producto cual mester worde usá como materia prima - of un intermediario - den quimico of industrianan relacioná."

Algun petroquimico ta worde bendi como gas. Ethylene, un di e gasnan, ta worde usá den fabricacion di tetraethyl lead, ethylene glycol permanent anti-freeze y pleythylene plastic.

Camisanan dacron, mea di nylon, articulanon di Plexiglas, brilnan di plastic, tur ta ehemplonan familiar di productonan trahá parcialmente di petroquimiconan bendi door di Enjay.

Ludwig Ta Encarga Cinco Tanquero di 104,500 Ton

Construccion di cinco tanquero nobo, cada uno 104,500 ton deadweight, a worde encargá door di D. K. Ludwig, e magnate Americano di bapcr. Posiblemente esaki ta e encargo mas grandi di tur tempo den construccion di bapor, eual ta worde surpassá solamente pa e contractnan di gobierno durante guerra. E cinco super-tanqueronan lo worde trahá den e anterior shipyard naval na Kure, Japon, e mes camina cu Ludwig a yega di laga traha hopi tanquero eaba. E ta bao arendamiento na su compania, National Bulk Carriers, Inc.

Trabao lo cuminsa ariba e promer di e bapornan grandi nobo rond di Juni 1, 1958, y un oficial di compania a bisa cu definitivamente e lo bini cla e mes anja. Ta di spera cu e bapor aki lo ta na servicio promer cu esun di 106,000 ton cu ta worde bao construccion na Quincy, Massachusetts pa A. S. Onasis, e rival di Ludwig den mundo nautico internacional.

E encargo nobo di Ludwig ta trece na ocho e cantidad di bapornan sea planeá of cu ta worde trahá y eual lo surpassa 100,000 ton deadweight. Onasis ta trahando dos, y Stavros Niarchos ta traha e otro.

Actualmente e tanquero mas

grandi na servicio ta "Universe Leader" di Ludwig, un tanquero di 85,000 ton.

Poco detaye di e bapornan nobo a worde duná na publicidad, pero ta di spera cu nan lo ta mas of menos 900 pia largo y 135 pia ancho. Tres bapor — "Queen Elizabeth," "Queen Mary" y "United States" — ta mas largo, pero no asina hancho. No tin informacion tocante cuanto awa nan lo manda.

Tampoco no a tende nada di e costo di nan. Basá ariba informacion cu costo di traha tanquero na Japon ta mas of menos \$250 pa ton deadweight, e costo di cada tanquero lo ta mas of menos \$25,000,000.

Fecha no a worde duná pa completacion di tur cinco tanquero, pa motibo cu construccion di bapornan mas chikito — 45,000 y 85,000 ton — lo tuma lugar pareuw cu nan, tambe den e shipyard di Kure. E arendamiento di Ludwig ta termina na 1966, pero por worde renobá te 1971.

Un di e bapornan di Ludwig, e tanquero "Petrokure" di 38,000 ton, a drenta na Lago na December 1954 cu 240,000 barril di azeta erudo. E tabata 673 pia largo y tabatin un hanchura di 92 pia, y a haya hopi admiracion aki.

IT WAS many games ago that J. M. Maxey of the Storehouse opened the Lago Sport Park Knockout Football Tourney. Trophies to the champions and runners-up were awarded Oct. 19.

TABATA HOPI wega pasá cu J. M. Maxey di Storehouse a habri e Torneo di Knockout di Football na Lago Sport Park. Trofeonan na e campeonan y sub-campeonan a worde presentá 19 di Oct.

TWENTY-NINE years of Lago service comes to an end Nov. 1 for Maximo Gomes, shown here at his retirement luncheon. With him, from left, T. M. Binnion, L. E. Hodge, Mr. Gomes, K. E. Springer, E. L. de Kort and Fletcher Dunbar.

BINTI-NUEBE anja di servicio cu Lago ta yega na un fin Nov. 1 pa Maximo Gomes, kende aki ta na su comida di retiro. Hunto cu ne, di robéz, ta T. M. Binnion, L. E. Hodge, Sr. Gomes, K. E. Springer, E. L. de Kort y Fletcher Dunbar.

Off - the - Job Accidents Reach Shocking Total

A new and startling statistic compiled by Lago's Medical Department for the Off-The-Job Safety Committee, points out graphically the need for energetic and concerted efforts to reduce the number of accidents occurring to employees once they leave the job.

The records show that from Jan. 1 of this year through Sept. 30, six employees suffered disabling injuries on the job. In the same period, the number of employees who were injured off the job was 202. For all of 1956, the figures were 14 disabling accidents on the job and 375 off.

The company's off-the-job efforts are centered in a committee which comprises employees from every segment of Lago. Shortly after it was organized General Manager F. E. Griffin, in a letter sent to all employees at their homes, asked for company-wide support for the committee in its safety campaign. He said that safety experience gained on the job ought to be carried home by each employee and put into practice there, on the island's roads, and the athletic fields. Employees were invited by Mr. Griffin to turn in ideas and suggestions to the Off-The-Job Safety Study Group.

Those making up the Study Group are currently working on a number of projects designed to keep the program going. G. N. Owen is chairman, and members include Dr. R. F. Brace, E. J. Kulisek, E. B. Fowler, H. M. Nassy, W. C. Mink, Jr., F. H. Rittfeld, Mateo Reyes, W. G. Spitzer, Abdul Syed, and C. B. Shapley, secretary.

Correction

In the Oct. 5 issue of the Esso News it was reported that L. J. LeCluse had retired. This report was in error. The Esso News regrets any inconvenience caused.

Coreccion

Den edicion di Oct. 5 di Esso News a worde reportá cu L. J. LeCluse a retira. Esaki tabata incorrecto. Esso News ta lamenta e error aki.

NEW ARRIVALS

- September 26**
PETROCHIL, Lodowico B. - Storehouse: A son, Albertico Felix
DE WINDT, Alfonso - Feso Dining Hall: A daughter, Ercilia Maria
- September 27**
MADURO, Herman - Mech. Paint: A son, Rigoberto Rudolf
DUNLOCK, James A. - Lago Police: A daughter, Mary Martha
NAVAS, Joseph - Mech. Paint: A daughter, Hortensia
LLEWELLYN, Fitzroy - Instrument: A son, Vaughn Ernest
- September 28**
KOKIMAN, Ricardo R. - Gen. Serv.: A son, Laurencio Rafael
KOCK, Carlino - C&LE: A son, Claudio Alberto
BUCHANAN, James R. - TSD Eng.: A daughter, Jessica Dills
CROES, Juan A. - Mech. Pipe: A daughter, Gladys Elvira
SOLOGNIER, Raymundo - Gen. Serv.: A son, Hubert Raymond
DIJKHOFF, Ricardo - Rec. & Ship.: A daughter, Gerda Caroleen Marian
- September 29**
BOEKHOUDT, Encarnacion - Cracking: A daughter, Ludwina
- September 30**
KAS, Roman - Lago Commissary: A son, Mirto Roman
LIDJGE, Jean A. - LOP: A daughter, Delicia Melerica
- October 1**
FIGAROA, Jose - Gen. Serv.: A daughter, Emerita Rosaria
FIGAROA, Jose - Gen. Serv.: A daughter, Emerita Rosaria
- October 2**
FLEMMING, Dominico - C&LE: A son, Angel Leo
MADURO, Marco - Mech. Garage: A daughter, Maritza Marlin
NICOLAAS, Felipe E. - Mech. Admin.: A son, Francis Thonus
DIRKS, Jan - Mech. Machinist: A son, Dominico Candido
- October 4**
WINTERDAAL, Lorenzo - Mech. Pipe: A daughter, Francisca Jacentha
MATHESON, McKenly - Utilities: A daughter, Joy Emilia
- October 5**
AUGUSTIN, Simon - Gen. Serv.: A daughter, Jenny
GRUBB, Paul A. - Dentist: A son, John William
LEEST, Ausebio - Instrument: A daughter, Lidia Maria
BROWN, Alfred E. - Lago Commissary: A son, Pedro Guillermo

MADURO, Cerilio - Mech. Welding: A daughter, Maria Evelyn
HODGE, Samuel T. - Gen. Serv.: A son, Wayne Bernhard
- October 6**
GEERMAN, Maximo - Mech. Garage: A daughter, Erodita Maria
- October 7**
NIEKOOP, George H. - Rec. & Ship.: A daughter, Lisa Georgette
CANNLGIETER, Thomas B. - Mech. Storehouse: A son, Johnny William
VAN CLEEF, Thomas J. - Mech. Yard: A son, Marco Wilhelmus Sergio
KOCK, Prishiano R. - LOP: A daughter, Magdalena Marcelina
KOCK, Casper N. - Mech. Paint: A son, Denis Roberto

CRICKET CHAMPIONS is the St. Eustatius club, who won the recent Lago Sport Park cricket competition. CAMPEONAN DI cricket ta e equipo di St. Eustatius, cual a gana e reciente competicion di Lago Sport Park.

RUNNERS-UP to St. Eustatius in cricket play was St. Vincent. Trophies will be awarded to both teams Oct. 19 at the Sport Park following a presentation match.

SEGUNDA DEPUES di St. Eustatius den competicion di cricket tabala St. Vincent. Trofeonan lo worde entregá na ambos equipo Oct. 19 na Sport Park despues di un wega di presentacion.

Sport Park Finalists In Cricket, Football, Softball Honored

Presentations to champions and runners-up in three Lago Sport Park events will be made this weekend.

Trophies will be awarded at 9 p.m. Oct. 19 to Electrical, winners of the softball competition, and to the Storehouse, runners-up; and to Lago Police, interdepartment football champions, and Carpenter-Paint, runners-up.

The next day, Oct. 20, following a presentation match beginning at 10 a.m., the St. Eustatius cricket team will collect its winning trophy, and St. Vincent, runners-up, will take the second-place award.

All events will take place in the Sport Park.

Preceding the Saturday night ceremonies, there will be presentation

games played. Electrical and Storehouse will meet at 7 p.m. in a softball game, and Lago Police and Carpenter-Paint will play a soccer game beginning at 8 p.m.

Finalistanan di Sportnan Honrá

Presentacionnan na campeonnan y segunda den eventonan na Lago Sport Park lo tuma lugar e fin di siman aki.

Trofeonan lo worde entregá 9 p.m. Oct. 19 na Electrical, ganadornan di e competicion di softball, y na Storehouse, cual a sali segunda; y na Lago Police, campeonnan interdepartamental, y Carpenter & Paint, segunda.

E siguiente dia, Oct. 20, siguiendo un match di presentacion cuminzando pa 10 a.m., e equipo di cricket di St. Eustatius lo colecta su trofeo ganador, y St. Vincent, segunda, lo tuma e premio pa di dos lugar.

Tur eventonan lo tuma lugar na Sport Park.

Promer cu e ceremonianan Diasabra anochi. lo tin weganan di presentacion. Electrical y Storehouse lo encontra otro 7 p.m. den un wega di softball, y Lago Police y Carpenter & Paint lo hunga un wega di futbol cuminzando pa 8 p.m.

Studiante Ta Scirbi For di Holanda

Srta. Bernice Phillips, kende a laga Aruba recientemente pa studia na Kweekschool cu un subsidio di Lago Scholarship Foundation, ta reporta den un carta na e Foundation cu "tur cos ta excelente" na Holanda, y cu su studionan a cuminsa.

Srta. Phillips ta un estudiante di R. K. Kweekschool na Reuver, Holanda. El ta yiu di G. I. Phillips di Lago Police Department.

Den e carta el a expresa su aprecio na e Foundation pa su ayudo den e palabranan: "Un vez mas Lago ta demonstra su interes den futuro di Aruba door di yuda nos studiantenan."

Tambe el a menciona cu ya el a bishita varios lugar na Holanda, cual, manera el a scirbi, "ta un bunita pais."

Globetrotters Draw Wide Interest

If ticket sales are a barometer, the forthcoming appearance of the renowned Harlem Globetrotters at Lago Sport Park is developing a great deal of interest in Aruba.

In spite of demand there are still tickets available for the basketball game, acrobats and jugglers that make up the show. The date for the appearance is Oct. 27, 8 p.m., the show taking two hours and a half.

Admission prices are Fls. 7.50 for seats, Fls. 5 for standees.

Enjoy Affiliate Marks Birthday

Lago's Equipment Inspection Group isn't the only one celebrating a 25th birthday these days.

The Enjoy Co., originally formed as the Standard Alcohol Company, will be 25 years old next month.

Enjoy — it has had that name since 1946 — develops and sells in the U.S. and abroad petrochemicals made by Jersey Standard affiliates in the U.S. In all, about 40 different petrochemicals are marketed by the company, with most of them coming from catalytically cracked or steam-cracked gas oils or naphthas.

Enjoy defines a petrochemical as "any product specially derived from petroleum which is itself an organic chemical compound, or a product which is to be used as a raw material — or an intermediate — in chemical or related industries."

Some petrochemicals are sold as gases. Ethylene, one of the gases, is used in the manufacture of tetraethyl lead, ethylene glycol permanent anti-freeze and polyethylene plastics.

Liquid petrochemicals include isopropyl alcohols used for anti-stalling additives for gasoline, paint and lacquer solvents, and rubbing alcohol.

Solids include Vistanex and butyl rubber, both made from isobutylene. Dacron shirts, nylon stockings, Plexiglas items, plastic sun glasses — all are familiar examples of products made partially from Enjoy-sold petrochemicals.

PROFESSOR BENJAMIN SILLIMAN OF YALE

ONE OF THE FOREMOST AMERICAN SCIENTISTS OF HIS TIME, MADE THE FIRST COMPLETE CHEMICAL ANALYSIS OF "ROCK OIL" CRUDE PETROLEUM!

His famous report on rock oil, or petroleum, from Venango County, Pennsylvania was prepared in 1855 for the new haven businessmen who later financed the drilling of the historic Drake well. It forecast many uses for this fluid which since has become the lifeblood of America!

He envisaged the modern cracking process — which did not come into actual commercial use until more than a generation later! His report on this amazing source of light, heat, power, lubrication and chemicals, was a big factor in the oil industry's birth!

TODAY IN THOUSANDS OF WAYS, PETROLEUM PLAYS A LEADING ROLE IN OUR NATION'S ECONOMIC GROWTH AND HIGH STANDARD OF LIVING.

Eleccion

(Continua di pagina 3)

ta group head, Mechanical-Administration.

Sr. Mendes, un otro empleado cu largo servicio di 18 anja, dos luna, ta operator den Process Department. El ta representa cricket y volleyball. Representando volleyball ta C. A. Pierre, electricista den Mechanical-Electrical, kende tin nuebe anja, 10 luna di servicio.

Sr. Reyes tambe ta electricista den Mechanical-Electrical. El ta representa softball y tennis. El tin 18 anja, cuatro luna di servicio. Sr. Richardson, un patrolman den Lago Police Department, tin 19 anja, siete luna di servicio cu compania y ta representa cricket y baseball.

Representando cricket, D. N. Solomon, dry storage clerk den Wholesale Commissary, tin 19 anja di servicio. Sr. Winterdaal ta paint helper, Mechanical-Paint, y el ta representa futbol y baseball. El tin un anja, ocho luna di servicio.
